The Special Power of Global Experiences

I have a confession to make: I missed Arrival Day this Season.

It's always notable because of what it represents: new faces, new hope, a new start.

This edition, however, was more poignant than ever, as it wasn't just fresh-faced (and masked) new first-entrants from Uzbekistan and their peers stepping foot on Classico Opine for the first time.

I SEPTEMBER have missed this edition's New Experience, but with the campus full and the energy and excitement of the students buoying us up, it's clear that every day is an opportunity to celebrate the start of something new.

I hope that as you read this issue, you're inspired by our poetry magazine's efforts, and reminded of your own confidence and strength to make a positive difference. And wherever you are in the world, we hope you'll come back on board to our magazine sometime soon—be it for contributing, Reunion, or just to comment—and teach us, in turn, about all the world has taught you.

Dan Mwangi

Executive Editor, Classico Opine Magazine

A PERSON WHO SPREADS THE LIGHT OF KNOWLEDGE

Life is full of such beautiful coincidences that it seems that every person is a world. It is really worth taking an example from them. These coincidences do not enter our lives for nothing. They are sent by God either to shower good things or to teach great lessons.

I know a person who illuminates hearts with the light of knowledge and becomes an example. A person who cheers up a moody person with a laugh and a smile, whose heart is full of goodness, who has no malice in his heart, who is even afraid of hurting someone's heart, just like that, maybe even more Khushanov Alisher Oydinovich will be this person with beautiful feelings. Such beautiful feelings are embodied in this person, who is rich in qualities of true humanity. Alisher brother Khushanov was born on November 1, 1995 in Khatirchi district of Navoi region. He studied for 4 years at the Nukus State Pedagogical Institute named after Ajiniyoz, majoring in Uzbek language philology. In these 4 years, even though he was much older than other students, he achieved many successes due to his diligence, thirst for knowledge, and the fact that he did not stop working and learning. Organized courses and trained many students. Alisher brother Khushanov is the author of more than 80 scientific and journalistic articles, 1st place in the "Youngest Scientist of the Year 2021" international competition, 2nd place in "Student of the Year" 2021-2022, two-time winner of the State Scholarship named after Alisher Navoi and Ibrayim Yusupov State Scholar, laureate of the "30th Anniversary of our Independence" badge. This man, known as "the master of words", for today's youth who have never picked up a book, who waste their time on Instagram, Telegram, and other mobile networks, successful youth, is a person with deep potential even who can be a role model for everyone. Alisher brother, who has a passion for learning and a love for learning in his heart, has fulfilled the role of a real teacher when the time is right, and a real brother when the time is right for us and for his students. Before, I saw Alisher brother performing a monologue in a video, at that time I neither knew Alisher brother nor knew about his success. Times have passed. I got to know Alisher brother because of the monologue competition held at our

institute during my 3rd year. They pointed out my mistakes in performance and guided me. My respect for Alisher brother Khushanov increased even more after the help he gave me, that is, he became a teacher and showed me the right way. I will always admire this master of words, who never ceases to develop himself, his identity, and even other young people who are hungry for knowledge, to rise and rise, and penetrated all hearts with the light of knowledge, I'm happy to say, we just can't help but admit it. I did not say "master of words" for nothing, because I am very envious that the people working and studying at the Nukus State Pedagogical Institute recognize this person by this name. Because in circles, on big stages, on pulpits, with his head held high, he can express his thoughts clearly without any excitement, and he surprises many people with his politeness and eloquence. In every way, this person is worthy of envy, and can be a beautiful example for everyone. When I see Alisher brother or hear about his achievements, I remember the folk proverb "Seek knowledge from the cradle to the grave". This person is a beloved teacher and beloved person who won the hearts of many people with his knowledge, knowledge, diligence, and unceasing efforts. Alisher brother is a simple village boy, a successful person who has achieved many successes due to his pursuit of knowledge. They always walk in a positive state, have clear thoughts and a pure heart that radiates a beautiful light around them. They say that if you are surrounded by successful people, you will be surrounded by successful people. Indeed it is. Success is contagious. How many people dream of becoming a successful and knowledgeable teacher like Alisher brother Khushanov. It is not for nothing that they

say, "Have a beautiful desire, God will give you more than your desire." Currently, Alisher Khushanov Oydinovich has been admitted to the Navoi State Pedagogical University on the basis of a grant, is studying at the master's degree in his specialty, and is working in the most prestigious school in Navoi. God has gifted Alisher brother Khushanov with such beautiful abilities that not everyone is given these abilities. If a person seeks, everything is possible. Confidence, effort, will, enthusiasm, and patience are enough to work in the fields of interest. In the language of our people, there is also a proverb about such people: "You can do what you want." If a person seeks and tries, one day luck will surely smile, the result of his efforts will be sent by Allah in a beautiful way. I did not describe Alisher Khushanov, who was both my teacher and my brother, as "a person spreading the light of knowledge" for nothing. Phones, computers, all kinds of silly games, people who waste their time in cafes and restaurants, who have neither found their place in life, nor have any profession, nor achieved success, are a great example for the youth of our time. I wanted to show as a beautiful example. Due to the existence of such bright-faced people who are on the path of knowledge, the passion and enthusiasm for learning will increase even more. Seeing such people, you can take bold steps towards big goals. It is a great happiness to have people around us who are striving for knowledge and trying to achieve something in life. Like Alisher Khushanov Oydinovich, let there be more people who fill the hearts with the light of knowledge, who have real humanity, beloved teachers. Young people, let the future generation take an example from such bright-faced and dignified people. Let the great Ibn Sina and Bukhari grow up in our country. I wish Alisher Khushanov Oydinovich great success in his future studies and work. I wish them to be.

In conclusion, it should be said that if a person sees only good things in his life, thinks good things, has good doubts, is able to draw the right conclusions from trials and difficulties, he helps people and spares no time for knowledge in the way of good. If there is a person who shines his light, his life will be full of success, goodness and good people. There is no one who spreads good on the right path and leaves a good name with meritorious deeds, or follows the wrong path and is aimless, has not achieved anything in life, and has no place in any place. It is only up to you to be surrounded by negative thoughts and negative thoughts about you from other people. After all, knowledge does not humiliate a person in two worlds.

Path from darkness to light

The profession of a teacher is the largest, responsible and honorable profession among professions.

A teacher, lecturer is a specialist, a master of her craft, carrying out educational work with students of secondary schools, professional and academic lyceums of various directions. Our teachers, who are masters of their craft in all directions, conduct their activities and

diligently teach their students what they have learned. Working in such a responsible profession, training personnel for the future and leading them in this direction requires a lot of work and great patience. At the moment I am still studying, studying in my specialty, and the trust, place and importance of my teachers in me are great. As a result of the support of my teachers, I envy them the results of their methods and teaching with love, and work to improve, develop and justify the energy and trust they have lost in me... This article is about what inspired me to reach this point, namely trust in me. I want to tell you about the method of my mentors, who believed that I would definitely become a master of the profession.

I would like to briefly mention my teacher Muhammadiyeva Zulfiya, who inspired me to become a teacher. My teacher is strange to me. who taught me a lot in a short time.

She gave me great advice and guidance in my personal and social life and also filled me with tips on how to consciously think correctly, how to approach life situations correctly and how to remain calm in any situation. I thank them for this. When I say an unusual lesson: not in a special educational building, but at home, with the comforts of a table, chairs, a blackboard, not relying only on books and facts, they were able to shape my mind, thinking and interests in unlimited knowledge. At home alone with only 15 thousand soums, I can't go wrong. At this point I would like to emphasize one word of my teacher: "A teacher is a psychologist. She knows how to work with students, approach each student individually, influence their minds with his interests, and teach. When she chooses such a responsible profession", she must be able to believe in herself and in the knowledge she can leave behind!"

- So, we have teachers who are responsible, demanding, inquisitive, masters of their profession, and we can own our chosen profession as a result of the future education and knowledge. our teachers. I emphasize that we will get.

A student's inquisitiveness and interest in learning is determined by the ability of our teachers, who are masters of their profession, to interest the student in the lesson, and their skill is determined by the way they teach. student's face and eyes. in working with students... Every student who receives

education from such teachers can grow into a mature person with a bright future and a clear goal. At this point, I would like to emphasize that if a person has desire and effort, he can certainly read and search without choosing a situation, condition, or place...

My teacher left a warm impression on me! Although he taught at home, he was interested in his profession and seemed indifferent, but he was demanding and responsible. had a positive effect on my interest. Only 2 hours of class gave me an unforgettable pleasure, energy and a feeling of anticipation for tomorrow's class. As soon as the class was over, I would spend days wanting to come back the next day and take a lesson from them. No matter how much I say (or should I say feelings?) about my teacher, there are not enough descriptions.

I would not be wrong to say that many mature people have matured and matured with the actions of our teachers. With this article, I express my gratitude not only on behalf of my teacher, but also on behalf of students who, like me, are unable to express their inner wishes and gratitude for their teachers. As long as we have teachers, we will continue to rise and move.

With the support and blessings of our teachers and parents, we grow, grow and develop. The hard work, trust, and knowledge of these teachers helped us to reach today. We should strive to acquire professions that our teachers are proud of, thank them, show gratitude, receive their blessings! The holiday is approaching, dear teacher! This word has a great meaning and responsibility. I am trying and have been trying to justify the trust shown by my teachers and family members, to become the owner of a state scholarship, to be recognized by the name of our accomplished scholars, to occupy my place in society. I know that I need to sweat and work hard for such honorable and responsible goals. The role of my teachers and family members is invaluable in setting such goals.

In conclusion, as a result of the work of our teachers, we should acquire the knowledge that will be the foundation of our tomorrow, and try to become followers of our teachers who have a place in our society!

IS NOT THIS THE MOTHER WHO MADE THE WORLD AS IT IS NOW?

Mom! What a great human. She is a unique creature who spends her nights awake for her child, runs for his perfection, is ready to do anything for her family to live in peace, and can give unconditional love to those around her.

Mother! An inimitable person who gives life lessons, is enthusiastic, always supports and strengthens in any situation. A coach who can help both young and old, always shows the right way.

Now let me talk about my mother. My mother is, in a word, my hero. My life's jewel, my light that illuminates my path. In fact, every word fails to describe our mothers.

My angel on earth! I can't say much about my mother. The times when she spent 45 years of his life only and only for me, fed me without eating, bought clothes for me without buying for herself, worked for my development and education, stood shoulder to shoulder with me for 18 years, worked tirelessly so that I could study, taught without sleeping at nights. It is not enough to say how many praises I can say about the honorable person who studied with me and did not sleep.

in a word, for me, my mother is a wonderful teacher, a dear friend, a strict mentor. She teaches me what I don't know, she stands by me on a bad day and becomes my confidant. Indeed, dear ones, our mothers are our priceless wealth. Until now, they honored us, protected us, clothed us, fed us, loved us, taught us to love, gave us knowledge, guided us, supported us in every work, taught us what we did not know and are still lighting our

way like a beacon. The most interesting thing is that all this is happiness. So, how can one not honor, respect, and love such dignified

people? Our mothers are our angels here. Let's honor them!

Book is a tool for spiritual and spiritual maturity Without books, development and high spirituality cannot be achieved (Shavkat Miromonovich Mirziyoyev) Books are for any era and every It is a vessel of wisdom that travels in the sea of time and carries its precious cargo from generation to generation. We know very well that a book is a person's best friend and advisor, a source of knowledge and wisdom. There is no person who does not read a book and does not get a treasure of knowledge from it. The book calls people to goodness and purifies their hearts. They say that no evil will come from people who read books. We are constantly witnessing how correct this idea is. That is, a person who has read a book expands his thinking ability and worldview. He can understand what is good and what is bad. Such people are different from others. An important factor for a person to be educated, educated, professional, and happy is to be friends with books, to always read books,

and not to forget reading books for the rest of your life. Reading books has a special place in the happy, peaceful and prosperous life of young people. The key to any success is this book. It is the foundation of our future. Therefore, let's read a book, because if a book is a companion on the path of life, one will go through the paths of life with pleasure. The book is the companion of people on the way of life. It is a bright light that illuminates the path. It is also the one that shows us the right path in any situation. the transmitter is a beacon. In a word, the book is a means of spiritual perfection of people. No matter what great work or discovery people want, they first turn to books. They get useful knowledge from them and put it into practice. Every time we hold a book in our hands, our hearts feel a strange feeling. As we read them, we immerse ourselves in a different kind of fantasy. In the process of reading them, we get new ideas, learn a lot of knowledge that we did not know. we try In the process of reading a book, we are very interested in the life of the characters. When we see some characters, we want to be like them and we ask about all their good qualities. We hate the characters that we don't like. fades away and during this period feels as if he has fallen into that environment. The hero is with them on their happy days, and laughs with them when they are sad. The reason is that the book has a great impact on the spiritual world of a person. Our ancestors considered the book as dear as bread. They understood the value of the book. The number of book readers was also high in that period. For this reason, famous poets, scientists and poets grew up in that environment. Ibn Sina also realized the greatness of the book. That is, at the age of 17, he claimed the ruler of Khorezm during his illness. Ewazi asks for permission to use the Khorezm palace library. This also shows that the scientist has a high intellect. We face many

trials during our life, and the book gives us spiritual support to overcome these trials. Even if we don't like to do any work, if we read a book, our mind will be calm and our soul will find comfort. In fact, our whole life is like a book. There are different passengers in the book, each of them gets off at their respective stops. This is how the years go by. As each of us falls on our way, so do the pages of the book.

Goal-Action-Aspiration-Result

A person is wounded and lives thinking about tomorrow. The universe is structured like this, today is today, tomorrow will be a new day. We keep losing our time by days, hours, and seconds, but it would be useful if we spend it on certain, specific and definitely useful things.

What am I doing in the future?

This is the question I ask myself every morning when I wake up, when I remember the seconds I wasted, I will try not to repeat this mistake next time. The future is in each person's hands, as they make it. So, in order to be amazed at the miracle of our life, live a happy life, and brighter the future, we should start from today, right now, value every second, and of course, strive, search, study with patience and diligence. Along with the level of reading, the abil-

ity to think also grows. In the future, to become a smart, wise, intelligent, smart, agile, knowledgeable, polite, kind, sincere, broad-minded, deep-thinking person, it is necessary to completely get rid of laziness AND put aside sleep. We have it today. Being able to make the right choice for the future is one of the most important elements. For example, the election of the President of the Republic of Uzbekistan will be held soon. In this election, we, the youth, are the future, not only our future, but the future

of the whole nation, and we should vote for the candidate whom we think is the most worthy. The election is for us and the people of Uzbekistan, for our bright and bright future.

Today I am reading books for my future, I am sharing experiences. I have been striving for tomorrow, looking for it, drinking from the roots of knowledge with enthusiasm. Because what you strive for is true!!!

THE TEACHER IS THE HEART OF THE EDUCATIONAL SYSTEM (Sydney Hook)

We all have our favorite teachers in our life, but do we know about the role of teachers in our life? How can we grow, how can we be good at our field, how can we become successful without them? As everyone knows it is impossible to imagine our world without our teachers. The main reason is that the influence of a good teacher can never be erased. Because they open minds, inspire dreams, build confidence, and shine a light on the path towards leading a great life. Teachers are the most important and valuable part of our society, as they provide the state with knowledgeable

generation. The main function of teachers is that they teach children to set a goal in life, encourage them to do well and be successful in life. The youth of today are the creators of tomorrow and teachers are the most essential point that make children to get ready for their future. We said about teachers a lot, but why they are so important in life? As Nelson Mandela said "Education is the most powerful weapon which you can use to change the world." The main basis of education system is obviously teachers. They have ability to change the pupils' mind positively, teachers educate children and pupils carry the knowledge they are taught by their teachers for the rest of their life. More importantly, teachers make all other professions, namely other people who have different types of professions are also educated by teachers. Therefore, people admit that teaching is the profession that train all other professions.

I often call my teachers "superhero" for a range of reasons. They have a huge impact on my life and I believe the creators of my achievements are my teachers. They always provide guidance to me in every path of my life, not only in academic purposes, but also in life experiences. Teachers are able to see students' strength and weakness, and they try to give assistance or guidance according to these features whether get them up to speed or push them higher. They often help their student to reveal their best skills, teach about not only school subjects, but also valuable life skills such as communi-

cation, organization, following directions, giving a helping hand to people in trouble, being a beneficial individual for public and so on. Teachers are also source of motivation and inspiration for their students, as they motivate students to work hard, dedicate their time to gain well-rounded knowledge in order to achieve impressive accomplishments in life and in their academic career.

Teachers also play a role of mother or father when their students need. They can be a good listener and you can tell them all of your secrets and problems, as they only try to help you. Mustafa Kemal Atatürk once said "a good teacher

is like a candle. It consumes itself to light the way for others." It is undeniable that they are ready to dedicate their time, their life and everything for their students in order to see them to succeed in life. Therefore, people have a saying that not all superheroes have capes, some have teaching degrees. In conclusion, I want to offer a few statements of my own that I'm always obsessed with. I do not want to call my teachers as a "teacher", but I prefer to use the term "educational rock star" for them. Because my teachers are the star who taught me how to shine.

Don't tire on the walkway of probity, teachers...

On our way of life, someone always shows us the right path like a guiding star. She shares with us all the things she can, so that we do not get lost on our way, having gained experience from the lessons she has learned along the way of her life. Like our parents, our teachers always have a special place in the lives of their students.

When a child steps on the threshold of the first school, a new world and a new life greet him. A teacher accompanies the child on this life path. It is true that the first teacher and educator of a child is the parents. But in the next step, she will be her companion and accompanying trainer. The child is young and simple and innocent. Her vision of the future is also different. She wants to learn and understand what she needs to know faster. And her teacher seems to him to be the owner of inexhaustible knowledge. An example of a second parent who does not tire of answering any question. It is for this reason that the first teachers in a child's life deserve special respect. Not only the first teachers, but also every teacher-coach that we meet in our life has its place that is not like others. That is, if we understand the status of a teacher only in relation to a person who gives education and upbringing,

we will have a wrong understanding. Each person helps us to find our place in this life path, like a teacher.

Our teachers, who enlighten our lives with their love, do not tire of sharing all their knowledge so that we can understand who we are in this life. Due to their iron tenacity, they tirelessly pass their knowledge on to the younger generation. Our parents are the reason for our birth, our teachers are the reason for our growth as a person. They are also the reason why we are patiently aware of the world's sciences in the path of knowledge. It is their hard work that helps us find our way throughout our lives. The people of the world are prosperous because of their work. Due to the legacy of knowledge and culture left by them, the spiritual and maturity level of humanity has reached maturity. No matter who a person is, no matter what field he is a representative of, she achieves everything as a result of her teacher's upbringing and the lessons she gave.

In the world, there are many sciences and professions. But the teachers of those knowledge or professions are also teachers and trainers. The gardener of the world's knowledge is also considered a teacher. A gardener earns a reputation in the country for the garden he takes care of. The names of those who are respected among the people are mentioned together with the names of their teachers. The teacher is respected by his students. The teacher's life will merge with the lives of the students he left behind. For this reason, teacher life is still alive. The tradition of master-disciple is one of the ancient values of our nation. The foundations of the future are being laid by the services of the teachers-coaches and the education and manners given to their students. The fate of the country rests in the hands of the students they have trained. This is the responsible aspect of the teacher and mentor. The service of teachers-coaches is so great that it is rare to bow our heads to them. In the words of Alisher Navoi, "the truth is worthless". In fact, just as we reciprocate the kindness done to us, we should always justify the trust of our teachers and make them happy with our successes. It is the duty of every student to continue their path of knowledge, to take their prayers and raise a scientific generation for science and society, for the whole of humanity. The passion of the teachers-coaches for their students is commendable. They are kind mothers for their students, peerless virtues in science, traveling stars, and they do not waste their time or their knowledge. Even if she cannot spare time for her own child, she always finds time for her student.

When her student is considered worthy of an achievement, she is filled with joy more than what she herself has achieved. She rejoices in her victory, and does not get sad when she is depressed. It lights our way like a candle, even if it senses that it will even-

tually melt. Their hearts are as wide as the ocean, and they do not rest in the difficult and honorable work of imparting knowledge to the younger generation. They may live a simple and average life, but they teach their students to be rich. If one is not two, then one is taught to make ten. They illuminate our path like the sun. They help us to find the right path and help us to become good people. They will not fit in the worlds with our small achievement. Our achievement gives more joy than theirs. Yes, teachers are a beautiful work of art that nature has given. Her mercy and knowledge are both ungrateful and inexhaustible.

At the same time, the teacher is compared to the father. Just as fathers are ready for anything for their children, the teacher is always ready for anything for his student. Although he is distinguished by his simplicity, he wants his student to grow as tall as a great mountain. History has never seen great people. The reason why they are great and stay at this level is because of their teachers. Timur, who occupied half the world, Alexander, who united the East and the West under his hand, and Navoi, who took the world with his pen, bowed before the personality of the teacher. Be it state affairs or the secret and art of acquiring knowledge, all of them became the owners of such perfection as a result of the knowledge given by their teachers. Another noteworthy feature of Amir Temur's personality is that he paid special attention to the education of princes and provided them with good teachers. The fact that the rise of any nation concerns its future generation has been in the center of attention. King Iskandar also respected his teacher Aristotle like his father. According to legends, Alexander was asked, "Why do you respect Aristotle more than your father?" Alexander Rumi answers: "My father allegedly brought me down from heaven to earth. But my teacher Arastu raised me from the earth to the sky. In other words, my father was the reason I was born. "My teacher taught me knowledge and manners, which led to the growth of my career and honor". In fact, the teachers teach us about enlightenment from our youth. And every person with knowledge and enlightenment will have a high rank.

In conclusion, it can be said that the world rarely pays respect and reverence to the personality of the teacher for being at this level. The honor of being a teacher and the profession of a teacher will always remain great and sacred concepts. The greatest respect and endless gratitude in the human heart is expressed for our teachers. If the greatest institution in the world is a school, teaching and coaching will always be the greatest profession. The lessons given by the teacher cannot be measured by any wealth. It is an impossible debt to pay in full. It is our honorable duty to be their worthy generation!

THE ENLIGHTENED SOCIETY IS THE FOUNDATION OF THE THIRD RENAISSANCE

What is enlightenment? Enlightenment is education aimed at increasing the consciousness, knowledge, and culture of people. An enlightened society is a society consisting of mature, educated and well-educated people in all respects. In order to make our people free and happy with high culture and spirituality, the concept of "New Uzbekistan – an enlightened society" will be developed by President Shavkat Miromonovich Mirziyoyev.

This, in turn, serves to expand the consciousness and thinking, philosophy of life and worldview of the members of the society. The highest goal is to raise the intellectual potential and worldview of the population, especially the youth, to raise a mature generation that lives with a sense of patriotism, love and loyalty to the people. The education of such a generation is, of course, entrusted to our teachers, who are the pillars of our enlightenment. Because teachers are the backbone of all professions. Any

person is first brought up by a teacher. That is why we should always respect our teachers. Because, as Hazrat Navoi said, "If a student is a judge, if a teacher is pleased, God is pleased".

In order to build an enlightened society, first of all, it is necessary to pay great attention to the intellectual layer of our society, especially teachers, and to support them materially and morally.

If an enlightened society

is built, spirituality will rise among people by itself. After all, educated, well-educated people can become mature spiritual people.

Today, the reforms carried out in our country, the contributions of young people to the development of our society with their knowledge and skills, and the innovations they create are the first steps in building and improving an enlightened society in our New Uzbekistan. President Shavkat Mirziyoyev

said: "We need to know one thing: without science, without innovation, we cannot achieve the goals we set before ourselves. It is necessary to work for the result, not for the report" – shows that each of us has a special responsibility. Each of us should serve our country sincerely and not superficially.

At the stage of development, only an enlightened society can overcome all obstacles.

Our song

I wish I had a song and You were my listener
I wish my days were filled with you day
by day.
I wish the melody which was from the sea,
Letting every line be the text of our love.

I wish You could play the tune
You could take a picture of me making love.
If I listened, if you listened, if we cried ,
I would like to be happy if you wanted.

When you left, I'd sing you a song
You'd love me twist my lips again.
You'd hug me, missing , remembering,
You'd love me, love me, love me

Yes, it's true! I am your annoying song,
You love me , I love you.
Remember! Our song is only US
My heart asks for only you.

Tulip...

To hold the arms of my destiny
firmly,
Find me
Looking at the mountains, even on a rainy
way,
Bring a bouquet of tulips.

You are the person the artist drew on my
forehead!

Love me with your soul over and over again
My lips are red, the first time you see them,
Bring a hearty white tulip.

Perhaps,
we know each other
Maybe a stranger
But fate crossed our paths.
Having smiled from happiness in your hug,
Bring the happiest tulip.

Write one poem
from your heart
Let your words touch my heart.
So much...
Standing proudly in front of the flower holder,
Bring me your life!

Dilnura Rakhmanova

Despair

Will you have ham so embarrassed? For some reason, your soul cannot find a way other than despair? You will remain in the heat of despair. When this time is short, we want to be on the Straight Path.

First, think about are there people around you who are disappointed??

If you have been fighting for a long time without suffering with this feeling of hams yourself, be sure to read these.

Frustration usually arises from the bad things that those around you say to you or because you are not lucky in the ways of betrayal and for thousands of other reasons. Don't try how much your affairs only seem to be going back. In fact, one of us, Hecht, will not say for good if trouble comes. How many billions of people live on Earth. But the health of the ham does not go away. This is a clear fact !!

In one room, 3 candles are lit .For some reason, the candle called "Faith" was extinguished .Then he said, " Believe me, what am I going to do?" The rough place is dark as long as a person enters the room. But if he looks 1 candle is burning. The man shouted, " Why Are you burning hanuz ?"he said.

If there is a candle : " as long as I burn ,there is hope that the remaining 2 candles will burn

again. I'm a candle of hope".

In fact, the spark of hope can turn into a big flame. Albert Ein-

stein says, "Some children live in despair because of what they cannot achieve from childhood. Some chil-

dren do not care about this. Those kids will be explorers".

So don't despair!! 😞

MARKHAMAT

I'm Nigora Shermatova. I'm from Andijan in Uzbekistan. I was born on March 18, 1993. I'm 29 years old. I'm an English teacher. I have been working at school N 42 in Markhamat for 5 years. I love teaching.

Content -

How many novels, poems, have not been written.

Several inscriptions have not been written
No poet inventories his mother homeland
I will sing your laud, listen to my heart.
Homeland among homeland, native Markhamat

What kind of sorrow, did you see last day?
Enemies kicked your chest, how much yesterday.
But you are cheritable no word didn't say
You are my blood, flow in my heart
My paradise, my rank, mother Markhamat.

Enemies carried on your Dukchi Eshan
Been prohibition Usman, Rahman, Nishan.
Your fearless hero died, one-by-one
The great future, the honourable past
My beautiful homeland, you my Markhamat.

Tuxtasin Mirzayev was your sacrifice
He destroyed 40 enemies himself, nice
Kurbanbay dug foes your chest was a nice.
My valour, my honour, my spirit, my heart
My glory, my destiny, mother Markhamat.

Today, look, the sun is shining like a bright
Singing of all birds, all morning is light
Your field, your garden as liver as wide
My garden, my region, my valour, my heart
My native town, my dear, my large Markhamat.

Twig will be garden, if plant in soul
In the meadow, naughty, whinny horses, foal
Ever golden, ever silver don't equal your coal
My spring, my golden, my silver, my heart.
My cure, my dear, my world Markhamat.

Everyone gets drunk, an morning breeze
Every fruits as honey, split of your teeth
Your sun is my good day, you are my one

piece
My treasure, my wealth, my great, my heart
You are my spirit, courage Markhamat.

How many Mukhammads are in cradle till
The whole of boys will conquer, of course every hill
Who demeans your soil, hear I will kill
My single, my pearl, my darling, my heart
My treasure, my rich, my wealth Markhamat.

Finding peace of mind, my corner pleasant
If I can embrace, will snatch my hand
Going away from you, it is for my dead
My wise, my life, my borrow, my heart
My creatures, my sacred, fortress Markhamat

Eaming word define, my mind is weak
Oh my Uzbek people, I want to hug quick
Every time, Don't forget I am for your stick
My poem, my pride, my root and my heart

My destiny, my nation, you my Markhamat.

I LOVE YOU

Every time I miss you
Everywhere I see you
My dreams are only you
Please, believe me, I love you.

Believe me, my love I never lie
If you leave me my heart will cry
I'm ready to wait for you when I die
Please, believe me, I love you.

What can I do for you? Say.
I will give you my life, Stay.
Don't deny me, show me some way.
Please, believe me, I love you.

Nigora SHERMATOVA,
Uzbekistan

AKBAR GOSHALI

Bio -

Akbar Goshali In 1973 He was born in the Tovuz He graduated from the Azerbaijan Technical University in 1990-1995, and in 1998-2001 from the Academy of Public Administration under the President of Azerbaijan (second). THE SENSE OF A MOMENT

...The wind is blowing madly,
A rusty lock is reeling.
Wherever I look
I see a door and a lock.

I've kept one of the
passed days.
I cry on the same day
every year.

*

Why do you keep silent, incessant heart?
Am I a shabby cloth for you?
I can't go with you
Am I a faithless friend?

I came back after seeing the
other world,
Don't make this world narrow
for me.
If it waterlogs one day
Will I be Noah or Aghridagh?

I could get nothing in the past,
I stayed embracing sorrows.
I couldn't read my fate
Is my fate so unclear?

CONDITION

I see the world in black
It's black time of my heart.
It's said that,
"It's silent time of mountains" in
Shusha again.

Any mountain remained in Shusha,

All has moved.
Any fault remained,
Sorrows have moved.

My world is neither fair
nor unfair.
Don't ask what I do
I fight with myself.

MY HEART IS FULL OF MEMORIES

My heart is full of memories,
My heart is full of bloody
memories.
My heart is throbbing –
My heart is throbbing like that,
I remember the Altai.
May be here –
On the shores of the Caspian
Sea
If my heart wasn't throbbing
The Altai would not be remembered.
If the Altai are not remembered,
The fate will be remembered...
Would horses have wings
If my heart wasn't throbbing?

If one day I see
An army of hearts
Riding wind-winged horses,
Flying away to the Altai
I will be encouraged!...
My heart has the name of
blood,
My heart has wings.

WOMEN GIVE BIRTH TO BABIES

Women read poems,
But men read the women.
Women rock the cradle –
The cradle of the baby
Who has wishes for the future
But men rock the grief
That was left from the past.
Singing songs
Women sew a flag,
But men fight for the flag.
Women weave carpets,
To lay on the road
Where their lovers will walk.
Men lay roads
Through the rocks,
The roads leading to the settlements.
Women are beautiful creatures,
But men are handsome lovers,
Their love trembles like light,
On women's faces,
Those who are loved
Become more beautiful -
Thus love lasts forever.

Both women and men die,
Women's bodies are put into
the coffin,
But men leave themselves in

a woman's womb before they
die.
Women are taken on men's
shoulders,
But men stay in women's tears
when they die...

I LIVED SEVEN DEAD DAYS THIS WEEK

The hands of a broken clock
did not move to any direction.
The keys remained inside the
lock exactly seven days.
My mother did not pray at
dawn,
The great moon did not hear
my Father's "Salawat"...
The hooves of the ownerless
horse grew.
The master's fire was extinguished
The master's machine-tool rusted.

Would the spirit of the dark
times rest in peace
If those who wept for the dead,
If those who laughed at the living ones
Gathered and cried for dead
weeks, for the past days?

THE EXPLANATION OF WATER

"If a fish commits suicide it will
jump ashore,
If a person commits suicide he
will jump into the water".
If one dies before jumping into
the water
If one is buried before being
washed
Water will be poured on his
grave, on his grave...
Even if he has no grave...
Tears will flow from the eyes.
It is impossible to live without
you, good-named water.
If there are no tears in the eyes
Our dry throats will be wet
with a sip of water...
If you bend over a beautiful
girl's bare white legs
You will fall in love.
If you chase a brave man
You will succeed.
If you are thrown on the faces
You will be cold.

Even if you are a sea we call
you the Pacific,
Even if you are a river we call
you the Kur.
It would be better
If we lived madly
But died quietly
Either we are thrown into you
Or you are thrown on us.
If I could leave this life quietly
My poems would exist as long
as water.

Life is the greatest gift given to each of us. No one knows how long they will live in this world. This world is a test world, a transitory world. The most beautiful part of life is youth. A person will be able to do whatever he wants during his childhood. The most beautiful memories are in childhood. No one seems to have forgotten their youth. Childhood games, dear friends, fun—all these are unforgettable memories. But as the years go by, a person grows up. For example, going to school, studying science, studying in universities. It is not for nothing that he compares the knowledge he learned in his youth to a pattern carved in stone. Indeed it is.

If people spend their lives and time correctly they will have spent most of their lives meaningfully. Don't waste your time on the pleasures of youth. Read, learn, work in your favourite profession contribute to the development of society so that you won't regret in your life one day. May your relatives, parents and friends be proud of you. Many famous people were gifted from a young age. Directing your abilities in the right direction you will achieve success in the long-run. People who have worked hard because they were young they knew the value of work and also have to appreciate one's work. As N. A. Ostrivskiy said, "Life gives everyone a huge a priceless gift, it is youth full off energy youth full of knowledge and dreams". Therefore, we have to consider that youth is the main power of tomorrow. The results of today's difficulties, will be seen in the future. Imagine, you have a favourite profession and work, you have loved ones, your family, you have a new and expensive car. If you want to achieve them act now. Study hard now. Avoid useless and unnecessary work use modern gadgets correctly. Don't ruin your future because of the unnecessary playfulness of the youth.

A DREAM

Ugh... You know what? Today, I was walking around the market with my friends and suddenly I saw my father carrying someone's load. We saw each other, but we moved away without getting close so that people wouldn't recognize each other. Because I am ashamed of my father, I have told him this many times.

Farida, even if my father was a porter in the market, blind, disabled or deaf-mute, I would die for my father.

DO'ST

You have been with me sometimes, good or bad, you have even put your dreams aside for me, and most importantly, you have helped me to untie the locked knot in my heart and find my "me". Thanks for the help, friend!

When we talk about new Uzbekistan, first of all, new economic relations and a new economic outlook are embodied before our eyes.

People who know the ups and downs of the world can tell what to expect from the year. But 2020 rushed everyone. It was difficult for our compatriots and for the nations of the world. In fact, the events that took place in front of our eyes, the worries that befell our country rushes a person's mind and does not allow him to concentrate his thoughts. What we have seen and experienced is, figuratively speaking, similar to the tragedies given in textbooks, that is, the tragedy of the coronavirus that happened in 2020 robbed all of us of peace and made our hearts sleepless.

Based on our mentality, even in any difficult situation, the environment in the family depends on the adults. We overcame these and previous trials and difficulties under the leadership of First President Islam Abduganiyevich Karimov and Honorable President Shavkat Miromonovich Mirziyoyev, and we have reached these days... Of course, our

nation has a great past and a glorious history. This holy land was the cradle of many brave and heroic boys. These brave, brave and patriotic leaders have written the name of our nation in golden letters in the history. Hard days are over. The kindness and kindness shown to each other always brings light and joy to our hearts.

Language is the tool that most vividly expresses and determines the ethnic identity of each nation. In this sense, the President's speech in Uzbek for the first time from the podium of the UN is one of the greatest victories we have witnessed in the years of independence. It is the first foundation stone laid in the establishment of new Uzbekistan. Because today language is a political issue for us as well as a spiritual one. Independence Day, which is widely celebrated in our country every year, is also a historic day for us. Because our language, which has gone through many troubles, was humiliated and humiliated, and which brought up the great Navoi, Timur, Jalaluddin-u Babur, is regaining its passion. Uzbek is coming back to the world, New Uzbekistan is taking its place on the world stage! I would like to quote Quadratilla Rafikov's thoughts right here:

In his speech, the President used a folk phrase very aptly: "A flowing river flows." This saying, which has been proven over the years and has become almost wisdom, says that the Third Renaissance will definitely happen in our dear land, some scholars say that "Uzbeks

.....

Contd Page 21

Norsafarova Nilufar Boybori

Contd from Page 20

.....
or people living in this region are only suitable for black labor and wealth, science and calculation. - it is not surprising that the book soon swells up like a line drawn to insulting exclamations "you can't trust them". The people who look at us with disdain, in fact, are constantly hiding the fact that they have learned and learned about development.

Also, within the framework of the "Prosperous Village" program, the noble initiative that started in the village of Manas has reached the villages in the most remote areas.

Such opportunities given to us young people are proof that important initiatives await each of us in the future. The first way to achieve progress and renew our New Uzbekistan is to pay attention to science and enlightenment! Big changes are taking place in our country precisely in science. In the conditions of the development of modern society, the need for non-standard thinking creators is increasing. After all, attention to education is the foundation of the future. Expenditures on education are one of the main indicators of social development, because they reflect the level of attention paid to the education of citizens by the state and society. Investments in education are not only an important way to increase the human capital of the country and improve the prospects of economic development, but they also have their own value, because education expands people's worldview, provides opportunities for self-realization and contributes to the creation of their own materials,

well-being, and is directly related to a healthy lifestyle. In this case, direct changes also apply to the field of sports. To ensure the physical and spiritual well-being of the young generation in our country, to strive for a healthy lifestyle and to develop love for sports, to create a material base for children's sports in local areas, to create a material base for children's sports in populated areas, and to provide sports equipment and supplies. In 2002, the Children's Sports Development Fund of Uzbekistan was established in order to further activate its activities. The President of the Republic of Uzbekistan was elected as the chairman of the Foundation's patronage board. Chairman of Dzhokori Kenges of the Republic of Karakalpakstan, mayors of regions and Tashkent city were appointed as chairmen of patronage councils of regional branches. All these are the first steps in building New Uzbekistan. The desire to share with the world.

Knowledge of every language is a life for a person.

Language is a universal tool.

Try a foreign language, young people

The development of science and crafts is obvious.

These verses were written by our enlightened grandfather Avaz O'tar a century ago. This speech of our grandfather is a vivid example of the fact that even in those times, which we are used to seeing as extremely backward, language learning was considered an important means of development and understanding the world. Now, in today's modern postmodern world, where cultures are mixing, and the distances between values and concepts of

national identity are shrinking, the language factor has again emerged as an important and main factor in integrating into the world. As a citizen, as a pedagogue, I would like to make a proposal in this area for the further renewal of our New Uzbekistan. Since the majority of non-state educational centers for foreign languages in our republic are located in Tashkent, the most remote rural areas of each province are also like this. Training centers

should be established. May all our citizens be fluent in their own and foreign languages. So, science, language, innovation, development, renewal are interrelated and inseparable concepts, and in my eyes, New Uzbekistan is in science!!! After all, as the President said, "New Uzbekistan is, first of all, a new economy relations means a new economic worldview"

Abstract: While writing his work, the creator pays attention to every word of it. Although the work "Khamsa" was written by poets before Navoi, Navoi was very confused in

choosing names for each of the characters in his "Khamsa".

Key words: Navoi's "Khamsa", personal names, images, representation of historical figures in the work, character of heroes.

The works created by Alisher Navoi, the sultan of our grandfather's ghazal estate, are included in the series of works worthy of repeated reading and study by lovers of literature. serves ideological purposes.

The work "Khamsa" belongs to the type of priceless works that have not lost their value in the period from the 15th century to the present. This work was not given a high rating by contemporary poets for nothing. possible

In order to fully understand Navoi's famous work "Khamsa", it is necessary to pay attention to the following.

For example, why the names of the heroes are like that, interpreting their names, if it is a historical name, is important in understanding the essence of the work;

Determining the ancient place names and the locations of the countries recorded in "Khamsa", revealing the current name and territory, why the writer included these things in the work.

It is easier to read by classifying the images in the work into 3 types.

A) Images of prophets

B) Historical images

C) Traditional images (i.e. images of generous, loving, fair people)

Analysis of the epic "Farhad and Shirin". The epic "Farhad and Shirin" is the 2nd epic in "Khamsa", in which Navoi's dreams of a perfect person are expressed in the image of

Farhad. Navoi considers love to be the essence of human life, and in this epic, he tries to show the mediation of human love in reaching divine love. Every expression in the epic has a certain general philosophical meaning in images, pictures and symbols.

In his work "Khamsa", Alisher Navoi took Farhad as the main, perfect character. This is also one of the traditional characters. Farhad's knowledge and skills acquired from the Qur'an and Moni are not enough for Farhad to realize his identity. This is why he needed to go on a trip to Greece to see Socrates. Socrates is a perfect human being who reached the peak of perfection. Even though he lives in one place, his soul has traveled all over the world. Socrates tells Farhad about the structure of the world, the task of the human race, mortality and survival, real love and metaphorical love. On the way to Sokrat, a part of enlightenment passed through the places of maqamat and began to recognize his identity. Alisher Navoi would not have created a work expressing the interpretation of emotional experiences if Alisher Navoi had described the Sufi ideas as we said. artistic interpretation.

Analysis of the epic "Layli and Majnun". In the world of literature, for 13 centuries, poems and epics have been written on the painful and sad theme of love called "Layli and Majnun". The 3rd epic of Navoi's "Khamsa" is this love story. The fact that Majnun, who was taken to the Kaaba, shed tears and begged to increase the

.....

Contd Page 21

Ismailova Nigora Mirzoaliyevna

Contd from Page 20

.....
fire of love, testifies to the objectivity of Navoi's epic. In this epic, Navoi put forward the idea that pure love can take place in the hearts of pure people. The essence of the epic is that metaphorical love turns into real love. Majnun's love is a great example in this regard, because he loves Allah with his whole body, soul and tongue. At the same time, he is the most beautiful person with his compassion and incomparable talent. Majnun is a symbol of heavenly love beyond time and space. According to Navoi, every person should take the path of falling in love, enter into the history of love, and prepare himself not for death, but perhaps for drinking wasl mayi. This is the only meaning of this world, the poet says.

Analysis of the saga "Sa'bayi Sayor". "Sa'bayi Sayor" is the fourth epic of "Khamisa" and has a romantic adventure character. Bahram is the main character of the work, the name of the star Mars in the East. Bahram often appears as a symbol of battles and conspiracies. Navoi carefully read the epics about Bahram before him. The epic consists of 38 chapters, 5000 verses, the events of the work from the 12th chapter show that in the image of Navoi Bahram, love and kingship do not fit together. The telling of stories and the construction of palaces are also logically connected with Bahram's life and fate.

Analysis of the epic "Saddi Iskandari". "Saddi Iskandari" is the largest epic in Navoi's "Khamisa". It consists of 89 chapters and 7215 stanzas. It

is dedicated to Jahangir Iskandar, one of the famous figures in the East. Firdausi was the first to write this topic in the oriental literature, and then Ganjavi wrote a two-part epic called "Iskandarnama" about him. created. According to the poet, Alexander has four qualities - four statuses. These are: kingship, rulership, guardianship and prophethood.

Although the kingdom was written in Alexander's destiny, due to his deep knowledge, knowledge of wisdom and philosophy, and spiritual perfection, he is not Jahangir, who terrorized the world in Navoi's image of Alexander, who hoarded treasures by looting, but he took the world with wisdom, justice and order. the one who showed the example of management based on the principle. The wisdom that the world, wealth, crown, throne is not worth one day's worries and sorrows prevails in the work from beginning to end.

If you study Navoi's works more widely, you will once again be sure that the names of the characters are absolutely worthy of the character of the characters named by him. "Khamisa" can be seen in books and epics as well. One of the factors that make a person mature and, most importantly, enrich his spiritual world, is fiction. In fact, he built the foundation of our Uzbek national literature, and it has reached the level of art on a world scale. Alisher Navoi, the great genius who raised this great man, his works equal to the ocean, the work "Khamisa", which has a great place in world literature, has become a priceless masterpiece of mankind, a spiritual property for centuries. In addition to taste, he had to have a lot of life

experience. This is definitely a sign of humility and humanity in him. At that time, he was still widely known among the people for his works, and besides being a recognized poet, he had also tasted the bitterness and ups and downs of life. gave the opportunity to get to know the situation of the whole country and all social classes in depth and in detail. In particular, at this time, Navoi's words, pains, and opinions, which he would convey to the public through his artistic works, as a poet, as well as a great statesman and thinker, were lingering in his mind. Therefore, in the explanations of the creation of "Khamisa", it is scientifically correct to put not literary facts,

but life experience first.

If you carefully look at the process of creating "Khamisa", it is clear that the events of the work are related to the socio-political events and events in Navoi's daily life, and that they continuously affect the poet's mood and creativity in various forms. Navoi fulfilled his goal with honor. Taking into account the days the poet worked to create "Khamisa", the treasure of 54,000 verses will be finished in 6 months. Scholars and scholars welcomed the first "Khamisa" in the Turkish language with great applause. The work won the recognition of the famous poets of its time.

What is happiness? Is it happiness to achieve what someone lacks? When will he come? When is a person happy? God has written a beautiful destiny for us, each of us, while we live in it, we will taste happiness or unhappiness. In fact, each of us is happy. You just need to understand. There is good in everything. I repeat this word many times in my life. Because I believe in these words with all my heart. I want to tell you the story that made me believe in these words once again.

One day I was working in the yard when someone called me. They invited us to the wedding. July 21 was the wedding day. I did my job. Since it was summer, the days got hot quickly, as my grandmother used to say, it would be better to cook eggs

in a pan without fire. Around noon, my mother returned from work. They work in a hospital. We had lunch together. He saw the invitation left for us in the morning. I did not know whose wedding I asked my mother. Aunt Rabiya's daughter Gulnara's wedding. She prayed, may God be pleased with her. Sister Gulnara in our neighborhood was 37 years old. They worked in a preschool. My mother remained silent for a while and began to tell what had happened to her. I love these habits of my mother. They always share their feelings with me. They say that this is life, everything is possible. They will explain many things in a real way so that you can be an example. My sister Gulnara is the eldest child of the family. He has a sister and a brother. In fact, no one lives easily, but my sister Gulnara also grew up in difficulties. His father left him at the age of 11, and he started working at the age of 12. At first he worked in a store. I don't know how anyone can imagine, but when I was 12 years old, I went to school in the morning and returned home in the afternoon. My sister Gulnara worked at this age. Growing up early...responsibility...anxiety...Mom said it all. We talked about his performance, what about fatherlessness? An 11-year-old girl...everyone remembers her when she goes to school, on the street, in the market, everywhere. . When they were studying, they got engaged to a young man at the age of 18. At that time, he had finished his second year and was working in the store where he had worked in his youth. Maybe then Gulnara dreamed of my sister, maybe I didn't see love from my father,

maybe this boy made me happy, I felt that happy days are still ahead, happy days are near. Maybe his poor mother thought so too. Our tomorrow is known only to Allah. These are just things that came to mind. Now let's hear the word from my mother. When my sister Gulnara was returning from the store one day, she had an accident. Her legs were broken. I don't know what was going through her and her family's imagination at that time. They lived through these events that I was so moved by just listening to them. And the saddest thing is that this terrible event happened when they were about to marry a young man, and it ruined their sweet dreams. That is, the groom's side told them that there will be no wedding. My sister Gulnara somehow finished her studies. It was then that he started sewing hats again at home. According to my mother, my sisters often visited my sister Gulnara. Learned a trade. Later, my sister Gavhar were married off to a good place. In the meantime, my sister Gulnara recovered and started working in the kindergarten. It worked for a long time. Together with his brother, they rebuilt their house. My mother said that at one time, the guy who was engaged to my sister Gulnara, stopped the wedding after the accident and then married someone else. I don't know how long he lived with his wife. But that young man drank a lot of vodka, and one day when he got drunk, he fought with his wife and had a big fight, so he sent her home. At that time, they had 10-month-old children. He kept the child without giving it to his wife. After leaving, the young man gave the milk in the refrigerator

to a 10-month-old baby. This event was enough for everyone to hear. Murgakina died before realizing what life is. When I heard it, my flesh began to tremble. Is it possible for a person to be so merciless and stupid? It is a good thing that my sister Gulnara had an accident and that she did not marry the boy. Today, when they told me about the wedding, among all the events, they told my sister Gulnara, who turned 37 years old, to her wedding. God gives happiness to man. Sooner or later, big or small, he will definitely give it to everyone. But a person needs patience in many moments. It takes strength. Among these events, my sister Gulnara's brother also got married. And now, it's July 21. Gulnara's sister's wedding. My mother told me about this incident and emphasized that we came to this life for a test, that happiness cannot be easily achieved and that we should seek wisdom from everything. It is not easy for anyone in this world. Everyone is fighting their own battle. Everyone has their own mission, their own battlefield. Everyone thinks that the most difficult battlefield is his. In fact, the One who mobilizes to the battlefield is so great that everyone can carry out the task according to their own strength and endurance. The truth is that sometimes it is difficult to fight at all. Even if a person has little strength, it will come to the point of collapse. But at those times, perhaps by making one of his the cause, or by some other reason, He gives power. But until he gives the strength, the desire to start working again with enthusiasm, a person is as if dead and uncorrected. These testing days are actually necessary...

I am proud of my mother tongue

Language is the prelude to spirituality. It reflects not only the human heart, but also the past, present, future, culture and many other aspects of the nation. It is not for nothing that the tongue is compared to a mother. Just as mother is a great and respectable creature for us, language is so valuable for us, so we should value it, respect it, preserve it and pass it on to the next generation in a pure form like our mother. This is the honorable duty of every person who calls himself a child of this country. It is not for nothing that it is said that the language is the translator of the soul. Because every word, first of all, touches the heart strings. Then it is polished in words and conveyed to others. We should be proud to have such a priceless treasure. It is known that there are factors that show the spirituality of each nation. Language is such a priceless spiritual treasure. It is so powerful that it shakes the entire existence. Language is not only a means of communication, but also a reflection of people's spirituality and culture. As long as a nation has its own mother tongue, it means that it has something to say to the whole world. The fact that our mother tongue is being played on world platforms today awakens an infinite sense of pride in the heart of every Uzbek child. In particular, the speech of our honorable President Shavkat Mirmonovich in Uzbek during the general political debates of the 78th session of the United Nations General Assembly greatly moved our people. It served to increase respect, trust and interest in our language in the world community. The Uzbek language is so rich in words that even the most delicate feel-

ings can be expressed in it. About this, the Hero of Uzbekistan, Ozod Sharafiddinov, says: "The Uzbek language is not only an ancient language, it is a language rich in sophistication. It is a language that can reveal any meaning to the most delicate layers, can share pleasure with its beauty, can open the language of the sea and satisfy the sense of beauty." Indeed, our mother tongue is distinguished from other languages by this unique charm. Language is an incomparable wealth for every nation and people who realize their identity. It is such a valuable and priceless heritage for the Uzbek people. As much as the borders of the country need protection, its spiritual wealth also needs protection. As a symbol of respect for the mirror of the nation, we welcome October 21 every year in our country with special pride and excitement. Because our language embodies the precious heritage, history and present of our ancestors. A person who respects his lan-

guage lives in the heart of the motherland, the feeling of loyalty to the country. There are many aspects of the Uzbek language that have not yet been discovered. This shows that our language is colorful and rich in words. Mother tongue should be valued as much as motherland and family are dear to a person. Just as there is no river without water, so is a nation without language it won't happen. As long as every nation has a language, it is eternal. We need to show the limitless possibilities of the Uzbek language and make it one of the languages of the world. We must preserve our mother tongue, which is a spiritual part of the people, keep it beautiful and pure, and contribute to the world. At the end of my speech, I would like to emphasize that as long as there are people who have love for their mother tongue in their hearts, the prestige of our nation and the Uzbek language will increase even more.

A person's hands are visible holding a large black rectangular sign. The sign has the word 'ADVERTISE' in bold yellow capital letters on the top line and the words 'WITH US' in bold white capital letters on the bottom line. The background of the image shows a bright blue sky with some clouds and a blurred view of a beach and ocean.
